

Varied Fluency

Step 9: Reasoning about 3D Shapes

National Curriculum Objectives:

Mathematics Year 5: (5G3b) [Identify 3-D shapes, including cubes and other cuboids, from 2-D representations](#)

Differentiation:

Developing Questions to support reasoning about simple 3D shapes: cubes, cuboids and triangular or square based pyramids. Questions use nets and descriptions.

Expected Questions to support reasoning about familiar 3D shapes, including pyramids and prisms. Questions use nets and descriptions.

Greater Depth Questions to support reasoning about 3D shapes, including pyramids, prisms and hedrons. Questions use nets and descriptions.

More [Year 4 and Year 5 Properties of Shapes](#) resources.

Reasoning about 3D Shapes

1a. Count and name the 2D shapes in this net.

5 VF

Reasoning about 3D Shapes

1b. Count and name the 2D shapes in this net.

5 VF

2a. Match the net to the correct 3D shape.

5 VF

2b. Match the net to the correct 3D shape.

5 VF

3a. Which 3D shape does the statement describe?

I have 4 rectangular faces and 2 square faces.

5 VF

3b. Which 3D shape does the statement describe?

My base is a square and I have 4 triangular faces.

5 VF

4a. Match the faces to the correct 3D shapes.

8 square faces

square based pyramid

1 square base

triangular based pyramid

4 triangular faces

cube

5 VF

4b. Match the faces to the correct 3D shapes.

4 rectangular faces

triangular based pyramid

6 square faces

cube

A triangular base

cuboid

5 VF

Reasoning about 3D Shapes

5a. Count and name the 2D shapes in this net.

5 VF

Reasoning about 3D Shapes

5b. Count and name the 2D shapes in this net.

5 VF

6a. Match the net to the correct 3D shape.

5 VF

6b. Match the net to the correct 3D shape.

5 VF

7a. Which 3D shape does the statement describe?

My base is a pentagon and I have another opposite. All other faces are rectangles.

5 VF

7b. Which 3D shape does the statement describe?

I have five faces. Two faces are triangles and three faces are rectangles.

5 VF

8a. Match the faces to the correct 3D shapes.

5 rectangular faces

cuboid

2 triangular faces

pentagonal prism

4 rectangular faces

triangular prism

5 VF

8b. Match the faces to the correct 3D shapes.

A square face

cube

2 pentagonal faces

square based pyramid

6 square faces

pentagonal prism

5 VF

Reasoning about 3D Shapes

9a. Count and name the 2D shapes in this net.

5 VF

Reasoning about 3D Shapes

9b. Count and name the 2D shapes in this net.

5 VF

10a. Match the net to the correct 3D shape.

5 VF

10b. Match the net to the correct 3D shapes.

5 VF

11a. Which 3D shape does the statement describe?

I have 6 quadrilateral faces and two further faces that have two more sides than the other faces.

5 VF

11b. Which 3D shape does the statement describe?

My base is a six sided shape and I have faces that have half the number of sides as the base.

5 VF

12a. Match the faces to the correct 3D shapes.

rectangular faces

tetrahedron

4 triangular faces

dodecahedron

All pentagonal faces

pentagonal prism

5 VF

12b. Match the faces to the correct 3D shapes.

1 curved face

tetrahedron

All triangular faces

hexagonal prism

6 rectangular faces

cylinder

5 VF

Varied Fluency Reasoning about 3D Shapes

Developing

- 1a. 6 squares
2a. Triangular based pyramid
3a. Cuboid
4a.

Varied Fluency Reasoning about 3D Shapes

Developing

- 1b. 2 squares and 4 rectangles
2b. Cube
3b. Square based pyramid
4b.

Expected

- 5a. 3 rectangles and 2 triangles
6a. Hexagonal based pyramid
7a. Pentagonal prism
8a.

Expected

- 5b. 1 square and 4 triangles
6b. Pentagonal prism
7b. Triangular prism
8b.

Greater Depth

- 9a. 1 hexagon and 6 triangles
10a. Dodecahedron
11a. Hexagonal prism
12a.

Greater Depth

- 9b. 12 pentagons
10b. Hexagonal prism
11b. Hexagonal based pyramid
12b.
