

# Missing number (subtraction)– question 4

# Sheet 1

$$81 - \underline{32} = 49$$

If you know the biggest number, subtract the answer from it.

$$81 - 49 = 32$$

81	
49	?

$$\underline{91} - 76 = 15$$

If you don't know the biggest number, add the two values together.

$$76 + 15 = 91$$

?	
76	15

1 )  $\underline{\quad} - 73 = 17$       Answer =  $\underline{\quad}$

2 )  $\underline{\quad} - 39 = 28$       Answer =  $\underline{\quad}$

3 )  $\underline{\quad} - 62 = 29$       Answer =  $\underline{\quad}$

4 )  $\underline{\quad} - 57 = 19$       Answer =  $\underline{\quad}$

5 )  $43 - \underline{\quad} = 33$       Answer =  $\underline{\quad}$

6 )  $\underline{\quad} - 49 = 11$       Answer =  $\underline{\quad}$

7 )  $91 - \underline{\quad} = 22$       Answer =  $\underline{\quad}$

8 )  $88 - \underline{\quad} = 27$       Answer =  $\underline{\quad}$

# Missing number (subtraction)– question 4

## Sheet 2

$$81 - \underline{32} = 49$$

If you know the biggest number, subtract the answer from it.

$$81 - 49 = 32$$

81	
49	?

$$\underline{91} - 76 = 15$$

If you don't know the biggest number, add the two values together.

$$76 + 15 = 91$$

?	
76	15

1 )  $74 - \underline{\quad} = 63$       Answer =  $\underline{\quad}$       2 )  $99 - \underline{\quad} = 9$       Answer =  $\underline{\quad}$

3 )  $54 - \underline{\quad} = 33$       Answer =  $\underline{\quad}$       4 )  $91 - \underline{\quad} = 41$       Answer =  $\underline{\quad}$

5 )  $\underline{\quad} - 69 = 9$       Answer =  $\underline{\quad}$       6 )  $61 - \underline{\quad} = 34$       Answer =  $\underline{\quad}$

7 )  $60 - \underline{\quad} = 39$       Answer =  $\underline{\quad}$       8 )  $\underline{\quad} - 86 = 12$       Answer =  $\underline{\quad}$

# Missing number (subtraction)– question 4

# Sheet 3

$$81 - \underline{32} = 49$$

If you know the biggest number, subtract the answer from it.

$$81 - 49 = 32$$

81	
49	?

$$\underline{91} - 76 = 15$$

If you don't know the biggest number, add the two values together.

$$76 + 15 = 91$$

?	
76	15

1 )  $55 - \underline{\quad} = 31$       Answer =  $\underline{\quad}$

2 )  $94 - \underline{\quad} = 28$       Answer =  $\underline{\quad}$

3 )  $\underline{\quad} - 34 = 18$       Answer =  $\underline{\quad}$

4 )  $\underline{\quad} - 47 = 17$       Answer =  $\underline{\quad}$

5 )  $\underline{\quad} - 46 = 24$       Answer =  $\underline{\quad}$

6 )  $\underline{\quad} - 10 = 44$       Answer =  $\underline{\quad}$

7 )  $\underline{\quad} - 10 = 19$       Answer =  $\underline{\quad}$

8 )  $40 - \underline{\quad} = 8$       Answer =  $\underline{\quad}$

# Missing number (subtraction)– question 4

## Sheet 4

$$81 - \underline{32} = 49$$

If you know the biggest number, subtract the answer from it.

$$81 - 49 = 32$$

81	
49	?

$$\underline{91} - 76 = 15$$

If you don't know the biggest number, add the two values together.

$$76 + 15 = 91$$

?	
76	15

1 )  $\underline{\quad} - 63 = 12$       Answer =  $\underline{\quad}$

2 )  $\underline{\quad} - 69 = 8$       Answer =  $\underline{\quad}$

3 )  $\underline{\quad} - 42 = 54$       Answer =  $\underline{\quad}$

4 )  $\underline{\quad} - 13 = 69$       Answer =  $\underline{\quad}$

5 )  $69 - \underline{\quad} = 44$       Answer =  $\underline{\quad}$

6 )  $89 - \underline{\quad} = 28$       Answer =  $\underline{\quad}$

7 )  $78 - \underline{\quad} = 9$       Answer =  $\underline{\quad}$

8 )  $\underline{\quad} - 55 = 11$       Answer =  $\underline{\quad}$

## Sheet 1

$1) \quad \underline{\quad} - 73 = 17 \quad \text{Answer} = \underline{90} \quad 2) \quad \underline{\quad} - 39 = 28 \quad \text{Answer} = \underline{67}$

$3) \quad \underline{\quad} - 62 = 29 \quad \text{Answer} = \underline{91} \quad 4) \quad \underline{\quad} - 57 = 19 \quad \text{Answer} = \underline{76}$

$5) \quad 43 - \underline{\quad} = 33 \quad \text{Answer} = \underline{10} \quad 6) \quad \underline{\quad} - 49 = 11 \quad \text{Answer} = \underline{60}$

$7) \quad 91 - \underline{\quad} = 22 \quad \text{Answer} = \underline{69} \quad 8) \quad 88 - \underline{\quad} = 27 \quad \text{Answer} = \underline{61}$

## Sheet 2

$1) \quad 74 - \underline{\quad} = 63 \quad \text{Answer} = \underline{11} \quad 2) \quad 99 - \underline{\quad} = 9 \quad \text{Answer} = \underline{90}$

$3) \quad 54 - \underline{\quad} = 33 \quad \text{Answer} = \underline{21} \quad 4) \quad 91 - \underline{\quad} = 41 \quad \text{Answer} = \underline{50}$

$5) \quad \underline{\quad} - 69 = 9 \quad \text{Answer} = \underline{78} \quad 6) \quad 61 - \underline{\quad} = 34 \quad \text{Answer} = \underline{27}$

$7) \quad 60 - \underline{\quad} = 39 \quad \text{Answer} = \underline{21} \quad 8) \quad \underline{\quad} - 86 = 12 \quad \text{Answer} = \underline{98}$

## Sheet 3

$1) \quad 55 - \underline{\quad} = 31 \quad \text{Answer} = \underline{24} \quad 2) \quad 94 - \underline{\quad} = 28 \quad \text{Answer} = \underline{66}$

$3) \quad \underline{\quad} - 34 = 18 \quad \text{Answer} = \underline{52} \quad 4) \quad \underline{\quad} - 47 = 17 \quad \text{Answer} = \underline{64}$

$5) \quad \underline{\quad} - 46 = 24 \quad \text{Answer} = \underline{70} \quad 6) \quad \underline{\quad} - 10 = 44 \quad \text{Answer} = \underline{54}$

$7) \quad \underline{\quad} - 10 = 19 \quad \text{Answer} = \underline{29} \quad 8) \quad 40 - \underline{\quad} = 8 \quad \text{Answer} = \underline{32}$

## Sheet 4

$1) \quad \underline{\quad} - 63 = 12 \quad \text{Answer} = \underline{75} \quad 2) \quad \underline{\quad} - 69 = 8 \quad \text{Answer} = \underline{77}$

$3) \quad \underline{\quad} - 42 = 54 \quad \text{Answer} = \underline{96} \quad 4) \quad \underline{\quad} - 13 = 69 \quad \text{Answer} = \underline{82}$

$5) \quad 69 - \underline{\quad} = 44 \quad \text{Answer} = \underline{25} \quad 6) \quad 89 - \underline{\quad} = 28 \quad \text{Answer} = \underline{61}$

$7) \quad 78 - \underline{\quad} = 9 \quad \text{Answer} = \underline{69} \quad 8) \quad \underline{\quad} - 55 = 11 \quad \text{Answer} = \underline{66}$
